-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nishikawa (4,297,423).

At col.9, lines 15-20 Nishikawa teaches that it is known in the art to use an ultraviolet light source to neutralize static charge on a surface or object.

The device taught by Nishikawa differs from the claim by not being said to use a UV diode as the neutralizing light source.

It would have been obvious to one of ordinary skill in the art to use the teachings of Nishikawa to meet the claim because the substitution of one type of UV light source for another is a design choice well within the abilities of persons of ordinary skill in the art and is not considered an inventive step.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zheng et al (6,734,443).

In the last sentence of the abstract, Zheng teaches that it is known in the art to use a UV light source to neutralize static electricity accumulated on an object (target).

It would have been obvious to one of ordinary skill in the art to use the teachings of Zheng to meet the claim because the substitution of one type of UV light source for

another is a design choice well within the abilities of persons of ordinary skill in the art and is not considered an inventive step.

Allowable Subject Matter

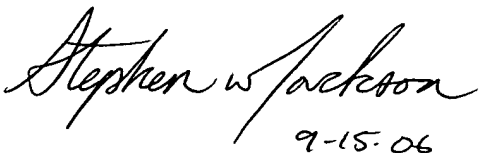

Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11,12 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The claims recite details of implementing a static neutralizer using UV diodes that are not taught or fairly suggested by the prior art of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen W. Jackson whose telephone number is 571-272-2051. The examiner can normally be reached on 6:30am-3:00pm M-F.
